

## LOST BOY STOOD ASLEEP AT DOOR

Three-Year-Old Child Followed a Band and Was Gone Fourteen Hours—Another Found Similarly.

Something in a pink and white pinafore drew the attention of Policeman William J. Selp, of the Union Market station, as he was passing a grocery store at Avenue D and East Fourth street early today. The something was a boy, three years old, who was standing asleep among the milk cans set around the store doorway.

The policeman awakened the child and tried to find out where he lived, but the sleepy little fellow gave him no assistance. When Selp offered him a peach and a banana the child ate them eagerly. He willingly went to the station and then to Headquarters, where he was turned over to Matron Travis.

A few hours later Joseph Alverto, of No. 26 Elizabeth street, rushed into Headquarters and with tears of joy recognized the child as his only son, Tony. The happy father told a strange tale

of the cause of the small runaway's travels alone in a great city. He said that a funeral had started from Elizabeth and Houston streets at 11 o'clock yesterday morning, and that Tony had followed it after the band. Fourteen hours the little boy wandered through the city alone, and was discovered more than a mile from home.

While Tony was being held at Headquarters another boy of the same age was brought in from the East One Hundred and Fourth street station. Policeman Edgerly found the child asleep in a doorway at Third Avenue and One Hundred and Fifth street.

## Teeth and Gums Examined Free.

Let All Who Suffer from a Dental Disease Call on Dr. Martin, the Eminent Discoverer of the Alveolar Method of Dentistry—There Is No Charge Whatever for Examination, Counsel and Advice.

The Doctor's Essay on Dentistry—48 Pages, Illustrated—Explains His System Fully; Can Be Had Free on Request.

Many a person knows that his teeth and gums are sadly in need of repair, and yet either because of indifference to comfort and personal appearance, or because he does not wish to pay for an examination by a dentist, or because he fears to be told the truth about their condition, he postpones the matter from time to time until months and even years pass and he has done nothing at all to better himself.

Diseases of the teeth and gums do not stand still—they are forever getting worse and worse. If, for instance, should prompt you to see a dentist, for, after all, it is best to know the truth rather than to delude yourself that it is less serious than it really is. So far as the expense is concerned, that need not stop you from seeing a dentist, and the most skilled in his profession too. Dr. G. Gordon Martin, of 329 5th ave., discoverer and sole practitioner of the Alveolar Method of dentistry, makes no charge whatever for examining the mouth and giving his professional opinion of your exact condition and just what you had better do to be cured.

Since Dr. Martin is at the very head of his profession it will surely be worth your while to have him examine you and get his opinion, and you consider that there is no charge attached to it, it would seem that every one who needs dental treatment should call. The fact that you have a free examination made puts you under no obligations to take treatment. That matter rests entirely with you. All that Dr. Martin desires to do in examining you free is to tell you how he would cure a condition like yours by his Alveolar Method.

You are no doubt aware that it was Dr. Martin who discovered the method whereby loose teeth are tightened, missing teeth replaced without plate or bridge-work, pyorrhea, receding gums, foul breath, &c., are cured, teeth owned without showy exposures—things it was impossible to do before his discovery. He alone practices this method, and if you need such important dental work done, you must come to him. Dr. Martin has saved many a one the necessity of wearing a plate of false teeth. Eminent men and women in professional and social life have attested to his remarkable skill in open letters which will be sent or shown to you on request.

If living too far away to call for free examination, write the doctor for terms, booklet, &c. His address is Dr. G. Gordon Martin, M. D., D. D. S. (Inc.), Suite 702—329 5th ave., N. W. cor. 22d st., New York. Describe your condition and he will answer you fully. When it is at all possible to do so, a personal call is preferred. Special appointments can be made for Sunday. Phone 5063 Madison.

DOES DYSPEPSIA OR INDIGESTION BOTHER YOU?

Do you know what it is to enjoy a good square meal? Even if you feel like it, dare you satisfy your desire?

There is a most complex function of the human body, yet it is, too, the most simple. It is the art of digesting food into a condition in which it can be assimilated. When you eat, your system is overtaxed or run down, the digestive system, which is really a digestive machine, fails to do its duty. First the gastric juices increase secretion of gastric juices and stimulate the food and stop assimilation, and then, with the aid of the digestive juices, the food goes on naturally—that's the whole secret. Fifteen days' treatment for twenty-five cents may be had of any Branch Store in New York. Brooklyn, Jersey City and Newark.

**The 1905 World Almanac** is the business man's most reliable handbook, a complete library of valuable information. It's the standard American annual. 25 cents; by mail, 35 cents.
